

## Summary

Bachelor of Science in Geodesy and Geomatics Engineering with a strong passion for spatial science and data science. With over 5 years of experience in the data industry, including 2 years dedicated to data science. Shows Commitment to continuous learning and growth, by maintaining a blog documenting my data science journey and insights into life. Possess leadership experience and actively volunteer to teach data science to others, demonstrating a commitment to knowledge sharing and community engagement.

## Skills and Stack

- **Machine Learning, Deep Learning, MLOps:** PyTorch, YOLO, XGBoost, MLFlow, Optuna, DVC , [scikit-learn](#), [statsmodel](#) , TensorFlow, Darts
- **Data Science:** VSCode, GeoPandas, Apache-Sedona, polars, ydata-profiling, duckdb, BigQuery SQL, ArcGIS Pro , Neo4j, Cypher
- **Deployment:** Git, GitHub, lazygit, DagsHub , [Gradio](#) , [HuggingFace](#), Azure, AWS
- **Relevant coursework:** computer vision (image classification, object detection), spatial analysis, time series forecasting, clustering, classification
- **Languages:** Bahasa Indonesia (Native), English (CEFR Level C1/IELTS 7.5).

## Professional Experience

### ESRI Indonesia (GIS Software & Services)

Jakarta, Indonesia

#### Data Scientist

January 2023 – present

Esri Indonesia provides GIS solutions and services to various industries in Indonesia, including local and national government, natural resources, utilities, transportation, telecommunications, and commercial.

- **Road Damage Detection:** created a data engineering pipeline to convert ~16k raw images and labels data from multiple sources to ready-to-train data. Trained a deep learning model using YOLOv8 and achieved a precision-recall score of 0.635 across all 4 classes.
- **GIS-Based Market Development:** collaborated with the solution team to develop a dashboard able to showcase current market presence and potential leads. Created a custom data processing pipeline capable of handling 193 million records, reducing manual process time by 72%. Applied a statistical method to classify ~300 top priority leads out of 4000 prospects
- **PM2.5 Forecasting:** developed a deep learning time-series forecasting pipeline to forecast the next 48 hours of PM2.5 trends. Designed >80 experiment combinations and used MLflow and Dagshub to monitor the result. The best model achieved RMSE of ~7.14.

### Zenius Education (Ed-Tech)

Jakarta, Indonesia

#### Business Intelligence Analyst

December 2021 - July 2022

Zenius is a well-known ed-tech company pioneer focused on increasing thinking capacity and building foundational thinking for junior and senior high school student to help them excel in their school.

- **Workflow management:** structured a system to increase workflow transparency and accountability. Increased the ability to manage and monitor ad hoc and internal tasks/projects from 0 to 16+ tasks/projects weekly.
- **Dashboard:** created 3 dashboards with Google Data Studio for growth, finance, and content teams with over 50 metrics ranging from operational to C-level granularity.

### Gojek (Q-commerce and Financial Services)

Jakarta, Indonesia

#### Junior Risk Data Analyst ⇒ Risk Data Analyst

April 2019 - December 2021

GoTo's ecosystem comprises of on-demand transport, e-commerce, food, and grocery delivery, logistics and fulfillment, and financial services through the Gojek, Tokopedia and GoTo Financial platforms.

- **Fraud analysis:** analyzed up to 1000 GPS movements daily to determine fraudulent patterns for constructing fraud rules of fourwheels and two-wheel platforms.
- **Rule deployment:** prevented new modus operandi from exploiting a GPS related-loop-hole in the production apps. Fraudsters abused this loop-hole for financial gain and reputation hijack. Reduced the number of case significantly from 400 to 10 cases daily, with a false positive rate under 1% within a month.
- **Rule enhancement:** analyzed the hypothesis made fraud my team then enhanced the rule by applying a more sophisticated method of fraud identification (relational graph logic) to detect the convoluted device connection/relat. Increased the detection rate by 50%.

## Project

- **Book Recommendation System:** built a local web app to give users a book recommendation based on collaborative filtering logic. Also created a simple search engine to ensure users are asking for the correct book to be recommended. [🔗](#)
- **MIT IDSS Course - Hackaton:** the objective of this problem is to understand which parameters play an important role in swaying passenger feedback towards a positive scale. Created logistic regression, XGBoost, and Deep learning model resulting in accuracy above 92%. [🔗](#)
- **JDVF - Tableau Dashboard:** this dashboard provides the government, NGO, and researcher among many other stakeholders a start to make data-driven decisions and policy-making regarding flood mitigation in West Java. [\[Tableau Public\]](#)

## Achievement

- **ESRI ArcGIS Pro Associate:** proof of experience in applying ArcGIS concepts and processes to workflows. Demonstrated proficiency using ArcGIS to manage, analyze, and manipulate geospatial data. [\[Certificate\]](#)
- **Neo4j Certified Professional:** official professional certification from Neo4j. [\[Certificate\]](#)
- **Panelist - ASEAN Geospatial Challenge:** a national level competition on geospatial solution and innovation. Involved as a panel in evaluating top 10 submissions. [\[Certificate\]](#)

## Education

### MIT IDSS: Data Science and Machine Learning

Remote

*An online professional course taught by the MIT faculty*

*August - November 2022*

Topic covered: statistics, unsupervised and supervised learning, hypothesis testing, deep learning, recommendation system, network and graphical model, and predictive analysis.

### Institut Teknologi Bandung

Bandung, Indonesia

*B.Sc in Geodesy and Geomatics Engineering, GPA 3.21/4.00.*

*July 2014 - October 2018*

Topic covered includes: calculus, statistics, GIS, satellite geodesy, remote sensing, spatial database, cartography.

## Leadership/Voluntary Experience

### Yayasan Anak Bangsa Bisa (YABB)

Jakarta, Indonesia

*Mentor/Instructor - Generasi Gigih*

*July - December 2021*

Yayasan Anak Bangsa Bisa (YABB) is a non-profit organization founded by Gojek, a catalyst that enables resilient change makers to solve pressing challenges and build sustainable communities. Generasi Gigih programme focuses on generating tech-talent by conducting an intensive boot camp to prepare fresh graduates for the tech industry.

- **Designed, created, and lectured:** data analysis lecture materials (Python and SQL for data analysis).
- **Mentorship:** guide and mentor the participants during their internship. Ensured the participants gained the most during their internship while maintaining the focus on the projects they were working on.

### Ikatan Mahasiswa Geodesi ITB (IMG-ITB)

Bandung, Indonesia

*Chairman of IMG-ITB (Executive Student Council)*

*August 2017 - March 2018*

Ikatan Mahasiswa Geodesi ITB (IMG-ITB) is a profession-based student association.

- **Visioning:** designed a blueprint as the north star metrics of the association. Mainly focus on character and mindset development in a professional manner and making a concrete social impact.
- **Executive function:** managed a council consisting of 5 ministries and 15 departments to maintain and develop the student association.

## Miscellaneous

- **Topic:** education, environment, game industry, movie, leisure.
- **Book:** history, sociology, biography, religion, psychology.
- **Activity:** SCUBA diving, hiking, gym, PC game, writing.
